

## Sunday Telegraph – Scottish Independence Survey

**Fieldwork dates:** 11-13<sup>th</sup> January 2012

**GB Interview Method:** Online

**Population effectively sampled:** All adults aged 18+ years

**Sampling Method:** In the UK, a nationally representative sample was selected at random from the NewVista<sup>™</sup> panel of 200,000+ adults, with sample selected in proportion to population distribution

**Sample size:** 1,734 English adults and 501 Scottish adults.

**Data weighting:** English data were weighted to the profile of all adults in England aged 18+, and Scottish data were weighted to the profile of all Scottish adults aged 18+. Data were weighted by sex, age, work status and region. Targets for the weighted data were derived from national sources in each country eg. National Readership Survey in the UK.

**Questions:** The computer tables attached in PDF format show each question, in full, in the order they were put to respondents, all response codes and the weighted and un-weighted bases for all demographics and other data including but not limited that published.

**Further enquiries:** martin.boon@icmresearch.com

**British Polling Council:** ICM is a member of the British Polling Council and abides by its rules. <http://www.britishpollingcouncil.org/>
